### UNITED STATES DISTRICT COURT DISTRICT OF NEW JERSEY

IN RE: INVOKANA (CANAGLIFLOZIN) : N
-------------------------------------

PRODUCTS LIABILITY LITIGATION : Master Docket No. 3:16-md-2750

Cheri Davenport, : JUDGE BRIAN R. MARTINOTTI : JUDGE LOIS H. GOODMAN

Plaintiff, :

DIRECT FILED COMPLAINT

vs. : PUI

PURSUANT TO CASE MANAGEMENT

ORDER NO. 4

Janssen Pharmaceuticals Inc., Janssen Research & Development LLC, Johnson & Johnson, Janssen Ortho LLC,

Civil Action No.:

Defendants.

#### **COMPLAINT**

Plaintiff files this Complaint pursuant to CMO No. 4, and is to be bound by the rights, protections and privileges and obligations of that CMO. Further, in accordance with CMO No. 4, Plaintiff, hereby designates the United States District Court for the Northern District of Alabama as the place of remand as this case may have originally been filed there. Cheri Davenport ("Plaintiff"), by and through undersigned counsel, brings this action seeking judgment against Janssen Pharmaceuticals, Inc., Janssen Research & Development LLC, Janssen Ortho LLC and Johnson & Johnson (collectively referred to as Defendants) for injuries and damages caused by Plaintiff's ingestion of INVOKANA, a drug in the gliflozin class.

#### **PARTIES**

1. At all times relevant hereto, Plaintiff was a resident and citizen of Tuscumbia, Colbert County, Alabama.

- 2. Upon information and belief, Defendant JANSSEN RESEARCH & DEVELOPMENT LLC f/k/a JOHNSON AND JOHNSON RESEARCH AND DEVELOPMENT LLC ("JANSSEN R&D") is a limited liability company organized under the laws of New Jersey, with its principal place of business at One Johnson & Johnson Plaza, New Brunswick, Middlesex County, New Jersey 08933.
- 3. As part of its business, JANSSEN R&D is involved in the research, development, sales and marketing of pharmaceutical products, including INVOKANA.
- 4. Upon information and belief, and at all relevant times, JANSSEN R&D was in the business of and did design, research, manufacture, test, advertise, promote, market, sell and distribute the drug INVOKANA for use as an oral diabetes medication.
- 5. Upon information and belief, defendant JANSSEN PHARMACEUTICALS, INC. f/k/a JANSSEN PHARMACEUTICAL INC. f/k/a ORTHO-MCNEIL-JANSSEN PHARMACEUTICALS, INC. ("JANSSEN PHARM") is a Pennsylvania corporation with its principal place of business at 1125 Trenton-Harbourton Road, Titusville, New Jersey 08560.
- 6. As part of its business, JANSSEN PHARM is involved in the research development, sales, and marketing of pharmaceutical products, including INVOKANA.
- 7. JANSSEN PHARM is the holder of the New Drug Application ("NDA") for INVOKANA.
- 8. Upon information and belief, and at all relevant times, JANSSEN PHARM was in the business of and did design, research, manufacture, test, advertise, promote, market, sell and distribute the drug INVOKANA for use as an oral diabetes medication.
- 9. Upon information and belief, defendant JANSSEN ORTHO LLC ("JANSSEN ORTHO") is a limited liability company organized under the laws of Delaware, having its

principal place of business at Stateroad 933 Km 0 1, Street Statero, Gurabo, Puerto Rico 00778.

Defendant JANSSEN ORTHO is a subsidiary of Johnson & Johnson.

- 10. As part of its business, JANSSEN ORTHO is involved in the research, development, sales and marketing of pharmaceutical products, including INVOKANA.
- 11. Upon information and belief, and at all relevant times, JANSSEN ORTHO was in the business of and did design, research, manufacture, test, advertise, promote, market, sell and distribute the drug INVOKANA for use as a diabetes medication.
- 12. Defendant JOHNSON & JOHNSON ("J&J") is a fictitious name adopted by Defendant Johnson & Johnson Company, a New Jersey corporation with its principal place of business at One Johnson & Johnson Plaza, New Brunswick, Middlesex County, New Jersey 08933.
- 13. As part of its business, J&J, and its "family of companies," is involved in the research, development, sales and marketing of pharmaceutical products, including INVOKANA.
- 14. At all times alleged herein, Defendants include and included any and all parents, subsidiaries, affiliates, divisions, franchises, partners, joint venturers and organizational units of any kind, their predecessors, successors and assigns and their officers, directors, employees, agents, representatives and any and all other persons acting on their behalf.
- 15. At all times herein mentioned, each of the Defendants was the agent, servant, partner, predecessors in interest and joint venture of each of the remaining Defendants herein and was at all times operating and acting with the purpose and scope of said agency, service, employment, partnership and joint venture.
- 16. At all times relevant, Defendants were engaged in the business of developing, designing, licensing, manufacturing, distributing, selling, marketing and/or introducing into

interstate commerce throughout the United States, either directly or indirectly through third parties, subsidiaries or related entities, the drug INVOKANA.

#### **JURISDICTION AND VENUE**

- 17. This Court has jurisdiction pursuant to 28 U.S.C. § 1332(a) because Plaintiff and Defendants are citizens of different States and the amount in controversy exceeds \$75,000 exclusive of interest and costs.
- 18. Venue in this action properly lies in this judicial district pursuant to U.S.C. § 1391(b) because, at all times material hereto, a substantial part of the events or omissions giving rise to this claim occurred in this District, and 28 U.S.C. §1391(a) because at all times material hereto, Defendants JANSSEN and JOHNSON & JOHNSON had their principal place of business in this District, and all the defendants conducted substantial business in this District related to INVOKANA. Additionally, the Multi-District Litigation was created in and assigned to this District.

#### FACTUAL BACKGROUND

- 19. Plaintiff brings this case against Defendants for damages associated with ingestion of the pharmaceutical drug INVOKANA, which was designed, manufactured, marketed, sold and distributed by Defendants. Specifically, Plaintiff suffered various injuries, physical pain and suffering, medical, hospital and surgical expenses as a direct result of using INVOKANA.
- 20. In March 2013, the United States Food and Drug Administration (FDA) approved Defendants' compound, *canagliflozin* (INVOKANA), for the treatment of type 2 diabetes, making Defendants' drug the first in its class to gain FDA approval.

- 21. Canagliflozin is a member of the gliflozin class of pharmaceuticals, also known as sodium-glucose cotransporter 2 (SGLT2) inhibitors, and is marketed in the United States by Defendants under the name INVOKANA.
- 22. Defendant J&J, the parent company of Janssen, is involved in the marketing and branding of Invokana, and publishes marketing and warnings regarding the product.
- 23. Defendants published advertisements on their company websites and issued press releases announcing favorable information about *Canagliflozin*. For example, the FDA's approval of *Canagliflozin* (INVOKANA) on March 29, 2013 was announced on the J&J website.
- 24. On March 14, 2016, J&J issued a press release announcing "First Real-World Evidence Comparing an SGLT2 Inhibitor with DPP-4 Inhibitors Shows Adults with Type 2 Diabetes Achieve Greater Blood Glucose Control with INVOKANA® (canagliflozin)." The former announcements did not contain warnings about ketoacidosis, serious infections, while the latter announcement mentioned these conditions. Neither announcement referenced pancreatitis or potential interactions with angiotensin converting enzyme inhibitors ("ACE inhibitors").
- 25. Defendant J&J also published information touting the strong sales of Invokana in its corporate reports and in earnings calls.
- 26. Further, J&J employees had responsibility for overseeing promotion strategies for the drug Invokana.
- 27. Materials including advertisements, press releases, website publications, and other communications regarding Invokana are part of the labeling of the drug, and could be altered without prior FDA approval.

- 28. Defendant J&J had the ability and the duty to improve the labeling of Invokana to warn of the propensity of the drug to cause pancreatitis, negative interactions with ACE inhibitors, diabetic ketoacidosis, renal injury, renal failure, severe infection, etc.
- 29. Defendant J&J so substantially dominates and controls the operations of Janssen and Janssen R&D that it could have required them to make changes to the safety label of the drug Invokana.
- 30. J&J employees hold key roles in the design, development, regulatory approval, manufacturing, distribution, and marketing of Invokana and direct these activities on behalf of J&J, Janssen, and Janssen R&D.
- In fact, J&J so substantially dominates and controls the operations of Janssen and Janssen R&D, that the entities are indistinct for purposes of this litigation such that Janssen and Janssen R&D should be considered agents or departments of J&J, and J&J is their alter-ego.
- 32. Defendant Janssen, a wholly owned subsidiary of J&J, acquired the marketing rights to Invokana in North America, and marketed, advertised, distributed and sold Invokana in Alabama and New Jersey and the remainder of the United States.
- 33. In February 2014, Janssen R&D submitted an NDA to the FDA for approval to market Invokana in the United States.
- 34. In August 2014, the FDA approved Invokana as an adjunct to diet and exercise for the improvement of glycemic control in adults with Type 2 Diabetes.
- 35. As part of its marketing approval of *canagliflozin*, the FDA required the Defendants to conduct five post-marketing studies: a cardiovascular outcomes trial; an enhanced pharmacovigilence program to monitor for malignancies, serious cases of pancreatitis, severe hypersensitivity reactions, photosensitivity reactions, liver abnormalities, and adverse pregnancy

outcomes; a bone safety study; and two pediatric studies under the Pediatric Research Equity Act (PREA), including a pharmacokinetic and pharmacodynamics study and a safety and efficacy study.

- 36. In an effort to increase sales and market share, Defendants have aggressively marketed and continue to aggressively market Invokana to doctors and directly to patients for off-label purposes, including, but not limited to weight loss, reduced blood pressure, kidney benefits, cardiovascular benefits and for use in Type I diabetics.
- 37. Defendants also, through their marketing materials, misrepresented and exaggerated the effectiveness of Invokana, both as to its ability to lower glucose, and its benefit for non-surrogate measures of health, such as reducing adverse cardiovascular outcomes.
- 38. Defendants' marketing campaign willfully and intentionally misrepresented the risks of Invokana and failed to warn about the risks of pancreatitis, negative interactions with ACE inhibitors, diabetic ketoacidosis, kidney failure, sepsis, and other injuries.
- 39. Defendant JANSSEN PHARM acquired the marketing rights to INVOKANA in North America, and in collaboration with Defendant JANSSEN R&D, submitted INVOKANA's NDA for approval.
- 40. Defendant JANSSEN ORTHO manufactures INVOKANA for distribution to consumers throughout the United States, including Alabama.
- 41. Upon information and belief, all Defendants participated in designing, developing, researching, manufacturing, marketing, distributing and selling INVOKANA.
- 42. INVOKANA is one of Defendants' top selling drugs, with annual sales exceeding \$1 billion.

- 43. As part of their aggressive and misrepresentative marketing campaign for INVOKANA, Defendants have already paid at least \$27 million to approximately 69,000 doctors to promote INVOKANA.
- 44. SGLT2 inhibitors, including INVOKANA, have FDA approval only for treating type 2 diabetes.
- 45. SGLT2 inhibitors, including INVOKANA, are designed to inhibit renal glucose reabsorption with the goal of lowering blood glucose. As a result, a significant portion of glucose is not metabolized, but instead is excreted through the kidneys of a population of consumers already at risk for kidney disease, and exposes the drug's users to an increased risk of the injuries complained of herein.
- 46. Because INVOKANA prevents patients from using a significant amount of the body's primary fuel, glucose, their bodies turn to fat as an alternate source of energy. As the body begins to breakdown fat, acids called ketones are introduced into the body's blood stream, creating the potential for acidosis excessive blood acidity.
- 47. Generally, when a person is suffering from ketoacidosis excess ketones in the blood, they also report high blood-glucose levels, and frequent urination.
- 48. Normally, the body excretes excess ketones through urination in order to obtain proper blood-acid balance; however, because INVOKANA places the kidneys under duress by expelling significant amounts of glucose that has not been metabolized through the urinary tract, INVOKANA users are often unable to obtain blood-acid balance without medical intervention.
- 49. Under normal circumstances, a person relies on the emergency jettison of excess sugar and ketones to maintain blood-acid balance through frequent urination only when in dire

need, but INVOKANA forces this very same emergency process on its users as its primary course of treatment-daily.

- 50. The pancreas is a gland located in the upper abdomen, behind the stomach. The pancreas produces enzymes that help digestion and hormones that help regulate the way the body processes glucose.
- 51. The alternate mechanism of action of INVOKANA and the increase blood glucose levels impacts the response of the pancreas to increased blood glucose which could result in pancreatitis.
- 52. Though INVOKANA is indicated for only improved glycemic control in type 2 adult diabetics, Defendants have marketed and continue to market INVOKANA for off label purposes, including but not limited to weight loss, and reduced blood pressure.
- 53. Generally, ketoacidosis is rare for type 2 diabetics, but much more common in type 1 diabetics. Type 1 diabetics are at greater risk of suffering ketoacidosis because, like INVOKANA users, their bodies are unable to metabolize glucose, leaving a significant amount to be expelled through the kidneys and the rest of the urinary tract.
- 54. On January 10, 2013, the FDA Endocrinologic and Metabolic Drugs Advisory Committee noted that in the first thirty days of use, INVOKANA had a cardiovascular event Hazard Ratio of 6.9, i.e., that patients who were taking INVOKANA had a 690% higher likelihood of suffering a cardiovascular event, including heart attack, than those taking a placebo.
- 55. On May 15, 2015, the FDA issued a Public Health Advisory linking SGLT2 inhibitors, including INVOKANA, to diabetic ketoacidosis, a condition which can result in organ failure and even death.

- 56. The FDA has also received a significant number of adverse event reports linking INVOKANA to kidney injuries, including renal failure, renal impairment, renal insufficiency and renal infection. 55. In December, 2015, the FDA required Defendants to change the INVOKANA warning label to warn of ketoacidosis, and urosepsis- a severe, life-threatening bacterial infection of the blood which can injure the kidneys.
- 57. In June, 2016, the INVOKANA warning label was changed to include kidney failure warning. Specifically, the FDA Drug Safety Communication Safety Announcement noted health care professional "should consider factors that may predispose patients to acute kidney injury prior to starting them on *canagliflozin*." The list of factors to consider included whether the patients are taking ACE inhibitors or diuretics.
- 58. In August, 2016, the INVOKANA warning label was changed to include reports of "fatal" diabetic ketoacidosis.
- 59. In February 2017, the INVOKANA warning label was changed to include more detailed warnings on diabetic ketoacidosis and acute kidney injury.
- 60. Since INVOKANA's release, the FDA has received a significant number of reports of severe kidney damage among users of INVOKANA.
- 61. An analysis of the FDA adverse event database shows that patients taking INVOKANA are several times more likely to report severe kidney damage than those taking non-SGLT2 diabetes drugs to treat diabetes.
- 62. Despite Defendants' knowledge of the increased risk of severe injury among INVOKANA users, Defendants did not warn patients but instead continued to defend and aggressively promote INVOKANA, mislead physicians and the public, and minimize unfavorable findings.

- 63. Despite their knowledge of data indicating that Invokana use is causally related to the development of diabetic ketoacidosis, kidney failure, stroke, and heart attack, Defendants promoted and marketed Invokana as safe and effective for persons such as Plaintiff throughout the United States, including Alabama and New Jersey.
- 64. Though Defendants did nothing to alert United States consumers, and health care professionals of the risks associated with INVOKANA, they did send "Dear Doctor" letters warning of INVOKANA's ketoacidosis risk to healthcare professionals in Canada, and Australia in July, 2015, after those countries' respective drug regulatory agencies issued safety announcements concerning INVOKANA. No such letter was sent to Plaintiff's healthcare providers.
- 65. Despite clear signals in the available data, Defendants did not tell consumers, healthcare professionals, or the scientific community about the dangers of INVOKANA.
- 66. Defendants' original and in some respects, current labeling and prescribing information:
  - a. Failed to investigate, research, study and define, fully and adequately, the safety profile of INVOKANA;
  - b. Failed to provide adequate warnings, about the true safety risks associated with the use of INVOKANA;
  - c. Failed to disclose the need to monitor ketones;
  - d. Failed to warn that pancreatitis, reactions with ACE inhibitors, and ketoacidosis can occur absent typical symptoms, such as high blood-glucose;
  - e. Failed to include a warning about pancreatitis, reactions with ACE inhibitors, ketoacidosis, and its life threatening propensities, associated with INVOKANA;
  - f. Failed to include a "BOXED WARNING" about renal failure, renal impairment, renal insufficiency and renal infection events associated with INVOKANA;

- g. Failed to include a "BOLDED WARNING" about renal failure, renal impairment, renal insufficiency and renal infection events associated with INVOKANA;
- h. Failed to include a "BOXED WARNING" about the risk of cardiovascular injury, including heart attack and stroke, associated with INVOKANA.
- i. Failed to include a "**BOLDED WARNING**" about the risk of cardiovascular injury, including heart attack and stroke, associated with INVOKANA;
- 67. Consumers, including Plaintiff, who have used INVOKANA for treatment of diabetes, have several alternative safer products available for treatment. SGLT2 inhibitors, including INVOKANA, are the only class of drugs which utilize the mechanism of expelling significant quantities of glucose through the kidneys to lower blood-glucose.
- 68. Defendants knew of the significant risk of severe injury caused by ingestion of INVOKANA. However, Defendants did not warn or did not adequately and sufficiently warn consumers, including Plaintiff, or the medical community of the severity of such risks.
- 69. To the contrary, Defendants conducted nationwide sales and marketing campaigns to promote the sale of INVOKANA and willfully deceived Plaintiff, her health care professionals, the medical community, and the general public as to the health risks and consequences of the use of INVOKANA.
- 70. Consumers of Invokana and their physicians relied on the Defendants' false representations and were misled as to the drug's safety, and as a result have suffered injuries including pancreatitis, negative reactions with ACE inhibitors, diabetic ketoacidosis, kidney failure, sepsis, cardiovascular problems, stroke, and the life-threatening complications thereof.
- 71. Plaintiff had several alternative and safer methods to treat her diabetes, including diet and exercise and other diabetes medications.

- .72. As a direct result, in June 2015, Plaintiff was prescribed and began taking INVOKANA, primarily to treat diabetes.
- 73. Plaintiff ingested and used INVOKANA as prescribed and in a foreseeable manner.
- 74. The INVOKANA used by Plaintiff was provided to her in a condition substantially the same as the condition in which it was manufactured and sold.
- 75. Plaintiff agreed to initiate treatment with INVOKANA in an effort to reduce her blood sugar. In doing so, Plaintiff relied on claims made by Defendants that INVOKANA was safe and effective for the treatment of diabetes.
- 76. Instead, INVOKANA can cause severe injuries, including pancreatitis, heart attack, stroke, renal failure, renal impairment, renal insufficiency, kidney injury and diabetic ketoacidosis.
- 77. After beginning treatment with INVOKANA, and as a direct and proximate result thereof, on or about March 16, 2016, Plaintiff suffered from acute pancreatitis.
- 78. As a result of her injuries, Plaintiff was hospitalized and required substantial medical treatment.
- 79. At the time of Plaintiff's injuries, Plaintiff regularly ingested the INVOKANA as prescribed by her doctor.
- 80. Defendants knew or should have known the risks associated with the use of INVOKANA, including the risk of pancreatitis.
- 81. The development of Plaintiff's injuries was preventable and resulted directly from Defendants' failure and refusal to conduct proper safety studies, failure to properly assess and publicize alarming safety signals, suppression of information revealing serious and life-

threatening risks, willful and wanton failure to provide adequate instructions, and willful misrepresentations concerning the nature and safety of INVOKANA. This conduct, as well as the product defects complained of herein, were substantial factors in bringing about and exacerbating Plaintiff's injuries.

- 82. Plaintiff's injuries were a reasonably foreseeable consequence of Defendants' conduct and INVOKANA's defects.
- 83. 82. At all times material hereto, Defendants, by and through their agents, servants and employees, negligently, recklessly and carelessly marketed, distributed and sold INVOKANA without adequate instructions or warning of its serious side effects and unreasonably dangerous risks.
- 84. Plaintiff would not have used INVOKANA had Defendants properly disclosed the risks associated with the drug. Thus, had Defendants properly disclosed the risks associated with INVOKANA, Plaintiff would have avoided the risk of developing the injuries complained of herein by not ingesting INVOKANA.
- 85. Defendants, through their affirmative misrepresentations and omissions, actively concealed from Plaintiff and his/her physicians the true and significant risks associated with ingesting INVOKANA.
- 86. As a result of Defendants' actions, Plaintiff and her prescribing physicians were unaware, and could not reasonably have known or learned through reasonable diligence, that Plaintiff had been exposed to the risks identified herein, and that those risks were the direct and proximate result of Defendants' acts, omissions, and misrepresentations.
- 87. As a direct and proximate result of Defendants' negligence, wrongful conduct, and the unreasonably dangerous and defective characteristics of INVOKANA, Plaintiff suffered

severe and permanent physical and emotional injuries. Plaintiff has endured pain and suffering, emotional distress, loss of enjoyment of life, and economic loss, including significant expenses for medical care and treatment which will continue in the future. Plaintiff seeks actual, compensatory and punitive damages from Defendants.

88. Plaintiff has suffered from mental anguish from the knowledge that she may suffer life-long complications as a result of the injuries caused by INVOKANA.

# FIRST CAUSE OF ACTION ALABAMA EXTENDED MAUFACTURERS' LIABILITY DOCTRINE ALABAMA CODE §§ 6-5-501 et seq.

- 89. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs with the same force and effect as if more fully set forth herein.
- 90. Defendants are strictly liable to Plaintiff under Ala. Code §§ 6-5-501 et seq. ("AEMLD").
- 91. Defendants have engaged in the business of designing, researching, manufacturing, marketing, supplying, promoting, packaging, selling, testing and/or distributing INVOKANA. Through that conduct, Defendants knowingly and intentionally placed INVOKANA into the stream of commerce with full knowledge that it reaches consumers, such as Plaintiff, who ingested it.
- 92. Defendants researched, developed, designed, tested, manufactured, inspected, labeled, distributed, marketed, promoted, sold and otherwise released INVOKANA into the stream of commerce. In the course of same, Defendants directly advertised, marketed, and promoted INVOAKAN to the FDA, health care professionals, Plaintiff and other consumers, and therefore had a duty to warn of the risks associated with the use of INVOKANA.

- 93. Defendants expected INVOKANA to reach, and it did in fact reach, prescribing health care professionals and consumers, including Plaintiff and Plaintiff's health care professionals, without any substantial change in the condition of the product from when it was initially distributed by Defendants.
- 94. INVOKANA, as manufactured and/or supplied by Defendants, was defective due to inadequate warnings or instructions, Defendants knew or should have known that the product created significant risks of serious bodily harm to consumers, as alleged herein, and they failed to adequately warn consumers and/or their health care professionals of such risks.
- 95. INVOKANA was defective and unsafe such that it was unreasonably dangerous when it left the Defendants' possession and/or control, was distributed by Defendants, and ingested by Plaintiff. INVOKANA contained warnings insufficient to alert consumers, including Plaintiff, to the dangerous risks and reactions associated with INVOKANA, including the development of Plaintiff's injuries.
- 96. This defect caused serious injury to Plaintiff, who used INVOKANA for its intended purpose and in a reasonably anticipated manner.
- 97. At all times herein mentioned, Defendants had a duty to properly test, develop, design, manufacture, inspect, package, label, market, promote, sell, distribute, supply, warn and take such other steps as necessary to ensure INVOKANA did not cause users to suffer from unreasonable and dangerous risks.
- 98. Defendants negligently and recklessly labeled, distributed and promoted INVOKANA.
- 99. Defendants had a continuing duty to warn Plaintiff of the dangers associated with INVOKANA.

- 100. Defendants, as manufacturers, sellers, or distributors of prescription drugs, are held to the knowledge of an expert in the field.
- 101. Plaintiff could not have discovered any defects in INVOKANA through the exercise of reasonable care and relied upon the skill, superior knowledge and judgment of Defendants.
- Despite the fact that Defendants knew or should have known that INVOKANA caused serious injuries, they failed to exercise reasonable care to warn of the severity of the dangerous risks associated with its use. The dangerous propensities of INVOKANA, as referenced above, were known to the Defendants, or scientifically knowable to them, through appropriate research and testing by known methods, at the time they distributed, supplied or sold the product. Such information was not known to ordinary physicians who would be expected to prescribe the drug for their patients.
- 103. INVOKANA, as manufactured and/or supplied by Defendants, was unreasonably dangerous when used by consumers, including Plaintiff, in a reasonably intended manner without knowledge of this risk of serious bodily harm.
- 104. Each of the Defendants knew or should have known that the limited warnings disseminated with INVOKANA were inadequate, but they failed to communicate adequate information on the dangers and safe use of its product, taking into account the characteristics of and the ordinary knowledge common to physicians who would be expected to prescribe the drug. In particular, Defendants failed to communicate warnings and instructions to doctors that were appropriate and adequate to render the product safe for its ordinary, intended, and reasonably

foreseeable uses, including the common, foreseeable, and intended use of the product for treatment of diabetes.

- 105. Defendants communicated to health care professionals information that failed to contain relevant warnings, hazards, contraindications, efficacy, side effects, and precautions, that would enable health care professionals to prescribe the drug safely for use by patients for the purposes for which it is intended. In particular, Defendants:
  - a. Disseminated information that was inaccurate, false, and misleading, and which failed to communicate accurately or adequately the comparative severity, duration, and extent of the risk of injuries with the use of INVOKANA;
  - b. Continued to aggressively promote INVOKANA even after Defendants knew or should have known of the unreasonable risks from use;
  - c. Failed to accompany their product with proper or adequate warnings or labeling regarding adverse side effects and health risks associated with the use of INVOKANA and the comparative severity of such adverse effects;
  - d. Failed to provide warnings, instructions or other information that accurately reflected the symptoms, scope, and severity of the side effects and health risks, including but not limited to those associated with the severity of INVOKANA's effect on acid-base balance and propensity to cause pancreatitis; and
  - e. Downplayed, or otherwise suppressed, through aggressive marketing and promotion the risks associated with the use of INVOKANA.
- 106. To this day, Defendants have failed to adequately and accurately warn of the true risks of injuries associated with the use of INVOKANA.
- 107. Due to these deficiencies and inadequacies, INVOKANA was unreasonably dangerous and defective as manufactured, distributed, promoted, advertised, sold, labeled and marketed by the Defendants.
- 108. Had Defendants properly disclosed and disseminated the risks associated with INVOKANA, Plaintiff would have avoided the risk of developing injuries as alleged herein.

- 109. The Defendants are liable to Plaintiff for injuries caused by their negligent or willful failure to provide adequate warnings or other clinically relevant information and data regarding the appropriate use of INVOKANA and the risks associated with its use.
- 110. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

### SECOND CAUSE OF ACTION MANUFACTURING DEFECT

- 111. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 88 of this Complaint with the same force and effect as if more fully set forth herein.
- 112. INVOKANA was designed, manufactured, marketed, promoted, sold and introduced into the stream of commerce by Defendants.
- 113. When it left the control of Defendants, INVOKANA was expected to, and did reach Plaintiff without substantial change from the condition in which it left Defendants' control.

- 114. INVOKANA was defective when it left Defendants' control and was placed in the stream of commerce, in that there were foreseeable risks that exceeded the benefits of the product and/or that it deviated from the product specifications and/or applicable requirements, and posed a risk of serious injury and death.
- 115. Specifically, INVOKANA was more likely to cause serious injuries, including pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis, than other diabetes medications.
- 116. Plaintiff used INVOKANA in substantially the same condition it was in when it left the control of Defendants and any changes or modifications were foreseeable by Defendants.
- 117. Plaintiff or her healthcare providers did not misuse or materially alter their INVOKANA.
- 118. Defendants' conduct, as described above, was reckless. Defendants risked the lives of consumers and users of INVOKANA, including Plaintiff, with knowledge of the safety problems associated with INVOKANA, and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, adequately warn, or inform the unsuspecting public. Defendants' reckless conduct warrants an award of punitive damages.
- 119. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death,

aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

### THIRD CAUSE OF ACTION DESIGN DEFECT

- 120. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 88 of this Complaint with the same force and effect as if more fully set forth herein.
- 121. INVOKANA was not merchantable and/or reasonably suited to the use intended, and its condition when sold was the proximate cause of the injuries sustained by Plaintiff.
- 122. Defendants placed INVOKANA into the stream of commerce with wanton and reckless disregard for the public safety.
  - 123. INVOKANA was in an unsafe, defective and inherently dangers condition.
- 124. INVOKANA contains defects in its design which render the drug dangerous to consumers, such as Plaintiff, when used as intended or as a reasonably foreseeable to Defendants. The design defects render INVOKANA more dangerous than other diabetes medications and cause an unreasonable increased risk of injury, including but not limited to pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 125. INVOKANA was in a defective condition and unsafe, and Defendants knew, had reason to know, or should have known that INVOKANA was defective and unsafe, even when used as instructed.

- 126. The nature and magnitude of the risk of harm associated with the design of INVOKANA, including the risk of pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis, is high in light of the intended and reasonably foreseeable use of INVOKANA.
- 127. The risks of harm associated with the design of INVOKANA are higher than necessary.
- 128. It is highly unlikely that INVOKANA users would be aware of the risks associated with INVOKANA through either warnings, general knowledge or otherwise, and Plaintiff specifically was not aware of these risks, nor would she expect them.
- 129. The design did not conform to any applicable public or private product standard that was in effect when the INVOKANA left Defendants' control.
- 130. INVOKANA's design is more dangerous than a reasonably prudent consumer would expect when used in its intended or reasonably foreseeable manner. It was more dangerous than Plaintiff expected.
- 131. The intended or actual utility of INVOKANA is not of such benefit to justify the risk of pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 132. At the time INVOKANA left Defendants' control, it was both technically and economically feasible to have an alternative design that would not cause pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis, or an alternative design that would have substantially reduced the risk of these injuries.
- 133. It was both technically and economically feasible to provide a safer alternative product that would have prevented the harm suffered by Plaintiff.

- 134. Defendants' conduct was extreme and outrageous. Defendants risked the lives of consumers and users of their products, including Plaintiff, with the knowledge of the safety and efficacy problems and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, re-label, warn or inform the unsuspecting consuming public. Defendant's outrageous conduct warrants an award of punitive damages.
- 135. The unreasonably dangerous nature of INVOKANA caused serious harm to Plaintiff.
- 136. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

#### FOURTH CAUSE OF ACTION FAILURE TO WARN

137. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 – 88 of this Complaint with the same force and effect as if more fully set forth herein.

- 138. Defendants had a duty to warn Plaintiff and her healthcare providers regarding the nature, likelihood, and severity of risks associated with INVOKANA, including but not limited to pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 139. Defendant's knew, or in the exercise of reasonable care, should have known about the risk of pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 140. Defendants failed to provide warnings or instructions that a manufacturer exercising reasonable care would have provided concerning the risk of pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis, in light of the likelihood that its product would case these injuries.
- 141. Defendants failed to update warnings based on information received from product surveillance after INVOKANA was first approved by the FDA and marketed, sold and used in the United States and throughout the world.
- 142. A manufacturer exercising reasonable care would have updated its warnings on the basis of reports of injuries to individuals using INVOKANA after FDA approval.
- 143. When it left Defendants' control, INVOKANA was defective and unreasonably dangerous for failing to adequately warn of the risk of pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 144. Plaintiff used INVOKANA for its approved purpose and in a manner normally intended and reasonably foreseeable by Defendants.
- 145. Plaintiff and Plaintiff's healthcare providers could not, by the exercise of reasonable care, have discovered the defects or perceived their danger because the risks were not open or obvious.

- 146. Defendants, as the manufacturers and distributors of INVOKANA, are held to the level of knowledge of an expert in the field.
- 147. The warnings that were given by Defendants failed to properly warn physicians of the risks associated with INVOKANA, subjecting Plaintiff to risks that exceed the benefits to the Plaintiff. Plaintiff, individually and through her physicians, reasonably relied upon the skill, superior knowledge and judgment of Defendants.
- 148. Defendants had a continuing duty to warn Plaintiff and her prescriber of the dangers associated with INVOKANA.
- 149. Had Plaintiff or her healthcare provider received adequate warnings regarding the risks associated with the use of INVOKANA, Plaintiff would not have used it.
- 150. Defendants' conduct, as described above, was extreme and outrageous. Defendants risked the lives of consumers and users of their products, including Plaintiff, with knowledge of the safety and efficacy problems and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, re-label, warn or inform the unsuspecting consuming public. Defendants' outrageous conduct warrants an award of punitive damages.
- 151. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death,

aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

### FIFTH CAUSE OF ACTION NEGLIGENCE

- 152. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 88 of this Complaint with the same force and effect as if more fully set forth herein.
- 153. Defendants directly or indirectly caused INVOKANA to be sold, distributed, packaged, labeled, marketed, promoted and/or used by Plaintiff.
- 154. The Defendants owed Plaintiff and other consumers a duty to exercise reasonable care when designing, manufacturing, marketing, advertising, distributing and selling INVOKANA, including the duty to take all reasonable steps necessary to ensure the product was not unreasonably dangerous to its consumers and users, and to warn Plaintiff and other consumers of the dangers associated with INVOKANA.
- 155. At all times material hereto, Defendants had actual knowledge, or in the alternative, should have known through the exercise of reasonable and prudent care, of the hazards and dangers of INVOKANA.
- 156. Defendants had a duty to disclose to health care professionals the causal relationship or association of INVOKANA to the development of Plaintiff's injuries.
- 157. Defendants' duty of care owed to consumers, health care professionals, and patients included providing accurate information concerning: (1) the clinical safety and

effectiveness profiles of INVOKANA, and (2) appropriate, complete, and accurate warnings concerning the adverse effects of INVOKANA, including the injuries suffered by Plaintiff.

- 158. During the time that Defendants designed, manufactured, packaged, labeled, promoted, distributed and/or sold INVOKANA, Defendants knew, or in the exercise of reasonable care should have known that their product was defective, dangerous, and otherwise harmful to Plaintiff.
- 159. Defendants knew, or in the exercise of reasonable care should have known, that the use of INVOKANA could cause or be associated with Plaintiff's injuries and thus created a dangerous and unreasonable risk of injury to users of the products.
- 160. Defendants knew that many health care professionals were prescribing INVOKANA, and that many patients developed serious side effects including but not limited to pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 161. Defendants breached their duty of reasonable care and failed to exercise ordinary care in the design, research, development, manufacture, supplying, promotion, marketing, advertisement, packaging, testing, quality assurance, quality control, sale and distribution of INVOKANA in interstate commerce, in that Defendants knew and had reason to know that a consumer's use and ingestion of INVOKANA created a significant risk of suffering unreasonably dangerous health related side effects, including pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis, and failed to prevent or adequately warn of the severity of these risks and injuries.
- 162. Defendants were further negligent in that they manufactured and produced a defective product containing *canagliflozin*, knew and were aware of the defects inherent in the

products, failed to act in a reasonably prudent manner in designing, testing and marketing the products, and failed to provide adequate warnings of the product's defects and risks.

- 163. The Defendants' failed to exercise due care under the circumstances, and their negligence includes the following acts and omissions:
  - a. failing to properly and thoroughly test INVOKANA before releasing the drug to market;
  - b. failing to properly and thoroughly analyze the data resulting from the premarketing tests of INVOKANA;
  - c. failing to conduct sufficient post-market testing and surveillance of INVOKANA;
  - d. designing, manufacturing, marketing, advertising, distributing, and selling INVOKANA to consumers, including Plaintiff, without an adequate warning of the significant and dangerous risks of INVOKANA and without proper instructions to avoid foreseeable harm;
  - e. failing to accompany their product with proper or adequate warnings or labeling regarding adverse side effects and health risks associated with the use of INVOKANA and the comparative severity of such adverse effects;
  - f. failing to provide warnings, instructions or other information that accurately reflected the symptoms, scope, and severity of the side effects and health risks, including but not limited to those associated with INVOKANA induced pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis;
  - g. failing to adequately warn users, consumers, and physicians about the need to monitor renal function in patients that do not already suffer from renal impairment;
  - h. failing to exercise due care when advertising and promoting INVOKANA; and
  - i. negligently continuing to manufacture, market, advertise, and distribute INVOKANA after the Defendants knew or should have known of its adverse effects.
- 164. Defendants knew and/or should have known that it was foreseeable that consumers such as Plaintiff would suffer injuries as a result of Defendants' failure to exercise ordinary care in the manufacturing, marketing, labeling, distribution and sale of INVOKANA.

165. Plaintiff did not know the nature and extent of the injuries that could result from ingestion and use of INVOKANA.

166. Defendants' negligence was the proximate cause of the injuries, harm, and economic losses that Plaintiff suffered, and will continue to suffer, as described herein.

167. Defendants' conduct, as described above, was reckless. Defendants risked the lives of consumers and users of INVOKANA, including Plaintiff, with knowledge of the safety problems associated with INVOKANA, and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, adequately warn, or inform the unsuspecting public. Defendants' reckless conduct warrants an award of punitive damages.

168. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

### SIXTH CAUSE OF ACTION BREACH OF EXPRESS WARRANTY

- 169. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 88 of this Complaint with the same force and effect as if more fully set forth herein.
- 170. At all times material hereto, Defendants engaged in the business of testing, developing, designing, manufacturing, packaging, labeling, marketing, promoting, selling and/or distributing INVOKANA, which is unreasonably dangerous and defective, thereby placing INVOKANA into the stream of commerce.
- 171. Defendants expressly represented to Plaintiff, other consumers, Plaintiff's physicians, and the medical community, by and through statements made and written materials disseminated by Defendants or their authorized agents or sales representatives, that INVOKANA:
  - a. was safe and fit for its intended purposes;
  - b. was of merchantable quality;
  - c. did not produce any dangerous and life threatening side effects, and
  - d. had been adequately tested and found to be safe and effective for the treatment of diabetes.
- 172. These express representations include incomplete prescribing information that purports, but fails, to include the true risks associated with use of INVOKANA. In fact, Defendants knew or should have known that the risks identified in INVOKANA's prescribing information and package inserts do not accurately or adequately set forth the drug's true risks. Despite this, Defendants expressly warranted INVOKANA as safe and effective for use.
- 173. Defendants advertised, labeled, marketed, and promoted INVOKANA, representing the quality to health care professionals, Plaintiff, and the public in such a way as to induce INVOKANA's purchase or use, thereby making an express warranty that INVOKANA would conform to the representations. More specifically, the prescribing information for

INVOKANA did not and does not contain adequate information about the true risks of developing the injuries complained of herein.

- 174. Despite this, Defendants expressly represented that INVOKANA was safe and effective, that it was safe and effective for use by individuals such as Plaintiff, and/or that it was safe and effective to treat diabetes. Portions of the prescribing information relied upon by Plaintiff and her health care professionals, including the "Warnings and Precautions" section, purport to expressly include the risks associated with the use of INVOKANA, but those risks are neither accurately nor adequately set forth.
- 175. In particular the Consumer Medication Guide did not include any language that would suggest Invokana has been associated with pancreatitis, diabetic ketoacidosis, , kidney failure, blood infections, or kidney infections.
- 176. The representations about INVOKANA contained or constituted affirmations of fact or promises made by the seller to the buyer which related to the goods and became part of the basis of the bargain creating an express warranty that the goods shall conform to the affirmations of fact or promises.
- 177. INVOKANA does not conform to Defendants' express representations because it is not safe, has numerous and serious side effects, and causes severe and permanent injuries. Therefore, Defendants breached the aforementioned warranties.
- 178. At all relevant times, INVOKANA did not perform as safely as an ordinary consumer would expect when used as intended or in a reasonably foreseeable manner.
- 179. Neither Plaintiff nor her prescribing health care professionals had knowledge of the falsity or incompleteness of the Defendants' statements and representations concerning INVOKANA.

- 180. Plaintiff, other consumers, Plaintiff's physicians, and the medical community justifiably and detrimentally relied upon Defendants' express warranties when prescribing and ingesting INVOKANA.
- 181. Had the prescribing information for INVOKANA accurately and adequately set forth the true risks associated with the use of such product, including Plaintiff's injuries, rather than expressly excluding such information and warranting that the product was safe for its intended use, Plaintiff could have avoided the injuries complained of herein.
- 182. Defendants' conduct, as described above, was reckless. Defendants risked the lives of consumers and users of INVOKANA, including Plaintiff, because Defendants had knowledge of the safety problems associated with INVOKANA, and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, adequately warn, or inform the unsuspecting public. Defendants' reckless conduct warrants an award of punitive damages.
- 183. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred,

attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

### SEVENTH CAUSE OF ACTION BREACH OF IMPLIED WARRANTY

- 184. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 88 of this Complaint with the same force and effect as if more fully set forth herein.
- 185. Defendants manufactured, distributed, advertised, promoted and sold INVOKANA.
- 186. At all relevant times, Defendants knew of the use for which INVOKANA was intended, and impliedly warranted the product to be of merchantable quality and safe and fit for such use.
- 187. Defendants were aware that consumers, including Plaintiff, would use INVOKANA for treatment of type 2 diabetes and for other purposes, including but not limited to weight loss, and reduced blood pressure.
- 188. INVOKANA was neither safe for its intended use nor of merchantable quality, as impliedly warranted by Defendants, in that INVOKANA has dangerous propensities when used as intended and can cause serious injuries, including pancreatitis and subsequent diabetic ketoacidosis.
- 189. At all relevant times, Defendants intended that INVOKANA be used in the manner used by Plaintiff, and Defendants impliedly warranted it to be of merchantable quality, safe, and fit for such use, despite the fact that INVOKANA was not adequately tested.
- 190. Defendants were aware that consumers, including Plaintiff, would use INVOKANA as marketed by Defendants. As such, Plaintiff was a foreseeable user of INVOKANA.

- 191. Upon information and belief, Plaintiff and/or her health care professionals were at all relevant times in privity with Defendants.
- 192. INVOKANA was dangerous and defective when Defendants placed it into the stream of commerce because of its propensity to cause Plaintiff's injuries.
- 193. Plaintiff and the medical community reasonably relied upon the judgment and sensibility of Defendants to sell INVOKANA only if it was indeed of merchantable quality and safe and fit for its intended use.
- 194. Defendants breached their implied warranty to consumers, including Plaintiff.

  INVOKANA was not of merchantable quality, nor was it safe and fit for its intended use.
- 195. Plaintiff and her physicians reasonably relied upon Defendants' implied warranty for INVOKANA when prescribing and ingesting INVOKANA.
- 196. Plaintiff's use of INVOKANA was as prescribed and in a foreseeable manner as intended, recommended, promoted and marketed by Defendants.
- 197. INVOKANA was expected to reach and did in fact reach consumers, including Plaintiff, without substantial change in the condition in which it was manufactured and sold by Defendants.
- 198. Defendants breached the warranties of merchantability and fitness for its particular purpose because INVOKANA was unduly dangerous and caused undue injuries, including Plaintiff's injuries.
- 199. The harm caused by INVOKANA far outweighed its alleged benefit, rendering INVOKANA more dangerous than an ordinary consumer or health care professional would expect and more dangerous than alternative products.

- 200. Neither Plaintiff nor her health care professionals reasonably could have discovered or known of the risk of serious injury associated with INVOKANA.
  - 201. Defendants' breach of these implied warranties caused Plaintiff's injuries.
- 202. Defendants' conduct, as described above, was reckless. Defendants risked the lives of consumers and users of INVOKANA, including Plaintiff, with knowledge of the safety problems associated with INVOKANA, and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, adequately warn, or inform the unsuspecting public. Defendants' reckless conduct warrants an award of punitive damages.
- 203. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

## EIGHTH CAUSE OF ACTION NEGLIGENT MISREPRESENTATION

204. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 – 88 of this Complaint with the same force and effect as if more fully set forth herein.

- 205. Defendants owed a duty in all of their undertakings, including the dissemination of information concerning INVOKANA, to exercise reasonable care to ensure they did not create unreasonable risks of personal injury to others.
- 206. Defendants disseminated to health care professionals and consumers through published labels, marketing materials, and otherwise information that misrepresented the properties and effects of INVOKANA with the intention that health care professionals and consumers would rely upon that information in their decisions concerning whether to prescribe or ingest INVOKANA.
- 207. Defendants, as the designers, manufacturers, sellers, promoters, and/or distributors of INVOKANA, knew or reasonably should have known that health care professionals and consumers of INVOKANA rely on information disseminated and marketed to them regarding the product when weighing the potential benefits and potential risks of prescribing or ingesting INVOKANA.
- 208. Defendants failed to exercise reasonable care to ensure that the information they disseminated to health care professionals and consumers concerning the properties and effects of INVOKANA were accurate, complete, and not misleading. As a result, Defendants disseminated information to health care professionals and consumers that was negligently and materially inaccurate, misleading, false and unreasonably dangerous to consumers such as Plaintiff.
- 209. Defendants, as designers, manufacturers, sellers, promoters, and/or distributors of INVOKANA, knew or reasonably should have known that health care professionals would write prescriptions for INVOKANA in reliance on the information disseminated by Defendants, and that the patients receiving prescriptions for INVOKANA would be placed in peril of developing

serious and potential life threatening injuries if the information disseminated by Defendants and relied upon was materially inaccurate, misleading, or otherwise false.

- 210. From the time INVOKANA was first tested, studied, researched, evaluated, endorsed, manufactured, marketed, and distributed, and up to the present, Defendants failed to disclose material facts regarding the safety of INVOKANA. Defendants made material misrepresentations to Plaintiff, her health care professionals, the healthcare community, and the general public, including:
  - a. stating that INVOKANA had been tested and found to be safe and effective for the treatment of diabetes:
  - b. concealing, misrepresenting, and actively downplaying the severe and lifethreatening risks of harm to users of INVOKANA, when compared to comparable or superior alternative drug therapies; and
  - c. misrepresenting INVOKANA's risk of unreasonable, dangerous, adverse side effects.
- 211. Defendants made the foregoing representations without any reasonable ground for believing them to be true.
- 212. These representations were made directly by Defendants, their sales representative, and other authorized agents, and in publications and other written materials directed to health care professionals, medical patients and the public.
- 213. Defendants made these representations with the intent to induce reliance thereon, and to encourage the prescription, purchase, and use of INVOKANA.
- 214. Defendants had a duty to accurately and truthfully represent to medical professionals and consumers, including Plaintiff, the truth regarding Defendants' claims that INVOKANA had been tested and found to be safe and effective for treating diabetes.

- 215. The misrepresentations made by Defendants, in fact, were false and known by Defendants to be false at the time the misrepresentations were made.
- 216. Defendants failed to exercise ordinary care in making their representations concerning INVOKANA and in the manufacture, sale, testing, quality assurance, quality control, and distribution in interstate commerce of INVOKANA.
- 217. Defendants engaged in a nationwide marketing campaign, over-promoting INVOKANA in written marketing literature, in written product packaging, and in direct-to-consumer advertising via written and internet advertisements and television commercial ads. Defendants' over-promotion was undertaken by touting the safety and efficacy of INVOKANA while concealing, misrepresenting and actively downplaying the serious, severe and life-threatening risks of harm to users of INVOKANA, when compared to comparable or superior alternative drug therapies. Defendants negligently misrepresented INVOKANA's risk of unreasonable and dangerous adverse side effects.
- 218. Defendants' conduct, as described above, was reckless. Defendants risked the lives of consumers and users of INVOKANA, including Plaintiff. Defendants had knowledge of the safety problems and suppressed this knowledge from the general public. Defendants made conscious decisions not to redesign, re-label, adequately warn, or inform the unsuspecting public. Defendants' reckless conduct warrants an award of punitive damages.
- 219. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished

capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

## NINTH CAUSE OF ACTION FRAUDULENT MISREPRESENTATION

- 220. Plaintiff repeats, reiterates, and re-alleges paragraphs 1-88 of this Complaint with the same force and effect as if more fully set forth herein.
- 221. Defendants intentionally and fraudulently misrepresented the safety and efficacy of INVOKANA in the product label.
  - 222. Specifically, Defendants intentionally and fraudulently:
    - a. Provided a "Warnings and Precautions" section of the INVOKANA prescribing information that purports to expressly describe the relevant and material potential side-effects that Defendants knew or should have known about, but in which material and relevant information was fraudulently withheld from this section;
    - b. Provided Consumer Medication Guide that expressly indicates "What is the most important information I should know about INVOKANA?" and "What are the possible side effects of INVOKANA?" and "General information about the safe and effective use of INVOKANA" and fraudulently omits information INVOKANA has been associated with pancreatitis, diabetic ketoacidosis, kidney failure, stroke, or cardiovascular events;
    - c. On information and belief, each and every advertisement and marketing channel fraudulently omits information about the risks of INVOKANA and overstates the benefits:
    - d. Failed to disclose that INVOKANA was not as safe and effective as other diabetes drugs;

- e. Failed to disclose that INVOKANA does not result in safe and more effective diabetes treatments than other available drugs;
- f. Failed to disclose that the risk of harm associated with INVOKANA was greater than the risk of harm associated with other diabetes drugs;
- g. Failed to disclose that Defendants knew that INVOKANA was not adequately tested;
- h. Failed to disclose that testing had revealed unreasonably high risk of injury;
- i. On information and belief, failed to disclose that Defendants intentionally withheld safety information from the FDA; and
- i. Affirmatively asserted that INVOKANA was safe and effective.
- 223. Defendants knew that their representations were false, yet they willfully, wantonly and recklessly disregarded their obligation to provide truthful representations regarding the safety and risk of INVOKANA to Plaintiff, other consumers, Plaintiff's physicians, and the medical community.
- 224. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred,

attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

## TENTH CAUSE OF ACTION FRAUD

- 225. Plaintiff repeats, reiterates, and re-alleges paragraphs 1 88 of this Complaint contained in each of the foregoing paragraphs with the same force and effect as if more fully set forth herein.
- 226. Defendants intentionally, willfully, knowingly, and fraudulently misrepresented to Plaintiff, her prescribing health care professionals, the health care industry, and consumers that INVOKANA had been adequately tested in clinical trials and was found to be safe and effective as a diabetes treatment.
- 227. Defendants knew or should have known at the time they made their fraudulent misrepresentations that their material misrepresentations and omissions were false regarding the dangers and risks of adverse health events associated with use of INVOKANA. Defendants made their fraudulent misrepresentations willfully, wantonly, and with reckless disregard and depraved indifference for the safety and well-being of the users of INVOKANA, such as Plaintiff.
- 228. Defendants' fraudulent misrepresentations were made with the intent of defrauding and deceiving the health care industry and consumers, including Plaintiff and her prescribing health care professionals, so as to induce them to recommend, prescribe, dispense, or purchase INVOKANA, despite the risk of severe life-threatening injury, which Defendants knew were caused by the product.
- 229. Defendants fraudulently and intentionally concealed material information, as aforesaid. Defendants knew that INVOKANA was defective and unreasonably unsafe for its

intended purpose and intentionally failed to disclose information regarding the true nature of the product's risks.

- 230. Defendants fraudulently and intentionally failed to disclose and warn of the severity of the injuries described herein, which were known by Defendants to result from use of INVOKANA.
- 231. Defendants fraudulently and intentionally suppressed information about the severity of the risks and injuries associated with INVOKANA from physicians and patients, including Plaintiff and her prescribing physicians, used sales and marketing documents that contained information contrary to Defendants' internally held knowledge regarding the aforesaid risks and injuries, and overstated the efficacy and safety of the INVOKANA. For example:
  - a. INVOKANA was not as safe and effective as other diabetes drugs given its intended use;
  - b. Ingestion of INVOKANA does not result in a safe and more effective method of diabetes treatment than other available treatments;
  - c. The risks of harm associated with the use of the INVOKANA was greater than the risks of harm associated with other forms of diabetes drug therapies;
  - d. The risk of adverse events with INVOKANA was not adequately tested and was known by Defendants, but Defendants knowingly failed to adequately test the product;
  - e. Defendants knew that the risks of harm associated with the use of INVOKANA was greater than the risks of harm associated with other forms of diabetes drug therapies, yet knowingly made material misrepresentations and omissions of fact on which Plaintiff relied when ingesting INVOKANA;
  - f. The limited clinical testing revealed that INVOKANA had an unreasonably high risk of injury, including Plaintiff's injuries, above and beyond those associated with other diabetes drug therapies;
  - g. Defendants intentionally and knowingly failed to disclose and concealed the adverse events discovered in the clinical studies and trial results;

- h. Defendants had knowledge of the dangers involved with the use of INVOKANA, which dangers were greater than those associated with other diabetes drug therapies;
- i. Defendants intentionally and knowingly failed to disclose that patients using INVOKANA could suffer pancreatitis, renal failure, renal impairment, renal insufficiency, ketoacidosis, and sequelae;
- j. INVOKANA was defective, and caused dangerous and adverse side effects, including the specific injuries described herein.
- 232. Defendants made the above misrepresentations before, during, and after FDA approval of INVOKANA, and to date, continue to make such misrepresentations.
- 233. Defendants' misrepresentations were made through various methods, including but not limited to, INVOKANA's published labeling and medication guide, medical literature, promotional materials directed at consumers, promotional materials directed at health care professionals, and documentation submitted in support of INVOKANA's NDA.
- 234. Defendants had access to material facts concerning the defective nature of the product and its propensity to cause serious and dangerous side effects in the form of dangerous injuries and damages to persons who ingest INVOKANA, information that was not publicly disseminated or made available, but instead was actively suppressed by the Defendants.
- 235. Defendants' intentional concealment and omissions of material fact concerning the safety of INVOKANA was made with purposeful, willful, wanton, fraudulent, and reckless disregard for the health and safety of Plaintiff, and with reckless intent to mislead, so as to cause Plaintiff's prescribing health care professionals to purchase, prescribe, and/or dispense INVOKANA, and to cause Plaintiff to rely on Defendants' fraudulent misrepresentations that INVOKANA was a safe and effective diabetes drug therapy.
- 236. At the time Plaintiff purchased and used INVOKANA, Plaintiff was unaware that Defendants had made misrepresentations and omissions, and instead Plaintiff reasonably

believed Defendants' representations to constitute true, complete, and accurate portrayal of INVOKANA's safety and efficacy.

- 237. Defendants knew and had reason to know that INVOKANA could and would cause serious personal injury to the users of the products, and that the products were inherently dangerous in a manner that exceeded any purported warnings given by Defendants.
- 238. In reliance on Defendants' false and fraudulent misrepresentations, Plaintiff was induced to use and in fact used INVOKANA, thereby sustaining injuries and damages. Defendants knew and had reason to know that Plaintiff and her health care professionals did not have the ability to determine the true facts intentionally concealed and suppressed by Defendants, and that Plaintiff and her health care professionals would not have prescribed and ingested INVOKANA if the true facts regarding the drug had not been concealed by Defendants.
- 239. During the marketing and promotion of INVOKANA to health care professionals, neither Defendants nor the co-promoters who were detailing INVOKANA on Defendants' behalf, warned health care professionals, including Plaintiff's prescribing health care professionals, that INVOKANA caused or increased the risk of pancreatitis, renal failure, renal impairment, renal insufficiency and ketoacidosis.
- 240. Plaintiff reasonably relied upon Defendants' misrepresentations, where knowledge of the concealed facts was critical to understanding the true dangers inherent in the use of INVOKANA.
- 241. Defendants willfully, wrongfully, and intentionally distributed false information, assuring Plaintiff, the public, Plaintiff's health care professionals, and the health care industry that INVOKANA was safe for use as a means of diabetes treatment. Upon information and

belief, Defendants intentionally omitted, concealed, and suppressed the true results of Defendants' clinical tests and research.

- 242. Defendants' conduct was intentional and reckless. Defendants risked the lives of consumers and users of INVOKANA, including Plaintiff. Defendants knew of INVOKANA's safety problems and suppressed this knowledge from the general public. Defendants' intentional and reckless conduct warrants an award of punitive damages.
- 243. As a foreseeable, direct, and proximate consequence of Defendants' actions, omissions, and misrepresentations, Plaintiff suffered pancreatitis, subsequent diabetic ketoacidosis and other related health complications. In addition, Plaintiff requires and will continue to require healthcare and services. Plaintiff has incurred and will continue to incur medical and related expenses. Plaintiff also has suffered and will continue to suffer diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions, activation of latent conditions, and other losses and damages. Plaintiff has incurred and will continue to incur mental and physical pain and suffering.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's favor for compensatory and punitive damages, together with interest, costs herein incurred, attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff also demands that the issues contained herein be tried by a jury.

## **PUNITIVE DAMAGES ALLEGATIONS**

- 244. Plaintiff repeats, reiterates, and re-alleges each and every paragraph of this Complaint with the same force and effect as if more fully set forth herein.
- 245. Plaintiff is entitled to punitive damages because Defendants misrepresented and/or withheld information and materials from the FDA, the medical community and the public

at large, including the Plaintiff, concerning the safety profile, and more specifically the serious side effects and/or complications associated with INVOKANA.

- 246. In respect to the FDA, physicians and consumers, Defendants downplayed, understated or disregarded knowledge of the serious and permanent side effects and risks associated with the use of INVOKANA, despite available information that INVOKANA was likely to cause serious side effects and/or complications.
- 247. Defendants' failure to provide the necessary materials and information to the FDA, as well as their failure to warn physicians and consumers of the serious side effects and/or complications, was reckless and without regard for the public's safety and welfare.
- 248. Defendants were or should have been in possession of evidence demonstrating that INVOKANA causes serious side effects. Nevertheless, Defendants continued to market INVOKANA by providing false and misleading information with regard to safety and efficacy.
- 249. Defendants failed to provide the FDA, physicians and consumers with available materials, information and warnings that would have ultimately dissuaded physicians from prescribing INVOKANA to consumers, from purchasing and consuming INVOKANA, thus depriving physicians and consumers from weighing the true risks against the benefits of prescribing and/or purchasing and consuming INVOKANA.
- 250. The acts, conduct, and omissions of Defendants, as alleged throughout this Complaint were wanton, willful, fraudulent, dishonest and malicious. Defendants committed these acts with a conscious disregard for the rights, health and safety of Plaintiff and other INVOKANA users and for the primary purpose of increasing Defendants' profits from the sale and distribution of INVOKANA. Defendants' outrageous and unconscionable conduct warrants

an award of exemplary and punitive damages against Defendants in an amount appropriate to punish and make an example of Defendants.

- 251. Prior to the manufacturing, sale, and distribution of INVOKANA, Defendants knew that said medication was in a defective condition as previously described herein and knew that those who were prescribed the medication would experience and did experience severe physical, mental, and emotional injuries. Further, Defendants, through their officers, directors, managers, and agents, knew that the medication presented a substantial and unreasonable risk of harm to the public, including Plaintiff and as such, Defendants unreasonably subjected consumers of said drugs to risk of injury or death from using INVOKANA.
- 252. Despite its knowledge, Defendants, acting through its officers, directors and managing agents for the purpose of enhancing Defendants' profits, knowingly and deliberately failed to remedy the known defects in INVOKANA and failed to warn the public, including Plaintiff, of the extreme risk of injury occasioned by said defects inherent in INVOKANA. Defendants and their agents, officers, and directors intentionally proceeded with the manufacturing, sale, and distribution and marketing of INVOKANA knowing these actions would expose persons to serious danger in order to advance Defendants' pecuniary interest and monetary profits. Said conduct was motivated by the reprehensible motive of increasing monetary profits for the sale of INVOKANA.
- 253. Defendants' conduct was despicable and so contemptible that it would be looked down upon and despised by ordinary decent people, and was carried on by Defendants with willful and conscious disregard for the safety of Plaintiff, entitling Plaintiff to exemplary damages.

WHEREFORE, Plaintiff respectfully requests that this Court enter judgment in Plaintiff's

favor for compensatory and punitive damages, together with interest, costs herein incurred,

attorneys' fees, and all such other and further relief as this Court deems just and proper. Plaintiff

also demands that the issues contained herein be tried by a jury.

**PRAYER FOR RELIEF** 

WHEREFORE, Plaintiff prays for relief and judgment against Defendants, and each of

them, individually, jointly, and severally, as follows:

1. Judgment for Plaintiff and against Defendants;

2. Damages to compensate Plaintiff's injuries sustained as a result of the use of INVOKANA for past and future loss of income proven

at trial;

3. Physical pain and suffering of the Plaintiff; and any and all

damages allowed under the law;

4. Pre and post judgment interest as the lawful rate;

5. Exemplary and punitive damages in an amount in excess of the

jurisdictional limits, trebled on all applicable Counts;

6. A trial by jury on all issues of the case; and,

7. For any other relief as this court may deem equitable and just, or

that may be available under the law of another forum to the extent the law of another forum is applied including but not limited to

reasonable attorneys' fees and costs and expert fees.

**DEMAND FOR A TRIAL BY JURY** 

Plaintiff demands a jury trial as to all issues and defenses.

RESPECTFULLY SUBMITTED,

Dated: May 17, 2018 /s/: Richard A. Wright
